

Guiding a new path – a step by step guide to designing 3D printed guides in endodontics

Kajal B. Patel¹, Thomas Gill¹, Naren Thanabalan¹, Nahal Razaghi¹, Shakeel Shahdad², Mital Patel²

¹Specialty Registrar in Restorative Dentistry, Royal London Hospital, ²Consultant in Restorative Dentistry, Royal London Hospital

CASE 3

LL3 internal resorption with history of trauma approximately 20 years ago

coDiagnostiX® plan adjusted for endo sleeve to seat closer to incisal edge to improve accuracy

Guided drill not used to full working length, only used to extend in to resorption cavity (17.6mm) prior to the utilisation of conventional endodontics
